

STUDENT ATTENDANCE

Regular attendance is a critical factor in achievement. This achievement is directly related to the student's participation in, and contributions to, daily involvement in the school.

Building principals will have the responsibility to develop attendance policies addressing absenteeism, tardiness, and truancy, in addition to procedures relating to these matters. Policies and procedures for elementary students will be consistent across the district. The district will work in cooperation with the state's attorney and school resource officer(s) to be in compliance with truancy laws in state statute. All rules and regulations will be specified in handbooks developed at the building level which will be available to parents/guardians, students, and school personnel.
