

6th, 7th and 8th grade Art students

Remote learning March 23rd-27th 2020

You realize I want something fun for you to do from home but I also have to make sure that it meets visual art standards. I do realize the seriousness of the situation we are facing with this virus but we can still create and have some fun. I've searched and looked for the perfect lesson and it isn't out there! "Zombies," recycled junk "Zombies" created by you and your families! I am looking for 3 dimensional sculptures that are created out of everyday things from your homes, garages and sheds. Maybe you will use small scraps of wood, hamburger helper boxes, empty water bottles, bread bag twisties, screws, empty spice containers, craft supplies etc... the list is endless. How you put them together is up to you- some of you have hot glue guns, glue, caulk, tape, nails etc...

This project is very much without boundaries. It does need to be school appropriate. Size doesn't matter and how many people in your family help doesn't matter as long as you participated. Once you have finished creating and building your "Zombie" give it a name and write me a short story about how it survived social distancing for the Corona Virus or how it got the virus and survived having it. Be creative and have fun with this. When you complete this take a picture and email it to me at michelle.johnson@k12.sd.us or text it to me at 605-354-0645 be sure to include your NAME!

6-8.VA.Cr.2.1 Demonstrate willingness to experiment, innovate, and take risks to pursue ideas, forms, and meanings that emerge in the process of art-making or designing.

6-8.VA.Cr2.3Apply visual organization strategies (such as the principles of design) to produce a work of art or media that clearly communicates information or ideas
