

Once you have logged into apps.5jdesign.com. Click on the Messages Tab. (Circled in Red)

This pop up window will appear.

Type your Message in the given area. (Outlined in pink)

Always have the iPhone users and the Android Users selected.

Once you have your message typed select Push Notification and it will take you to the next tab "Location". Here you can select the area you want to send the notification to. You can send it to everyone in Huron that has the app or you can focus on the Huron Arena During a Basketball game and it will send to only the people in the Huron Arena that have the app.

Then it will take you to the Content Tab. Here you can link the message to a website.

Finally you will go to the 4th tab "Publish". Here is where you can select a certain time and day you want the message to send. Or you can publish it right then.
